PockeTracker

MOBILE ID VERIFICATION

VISION DATABASE SYSTEMS
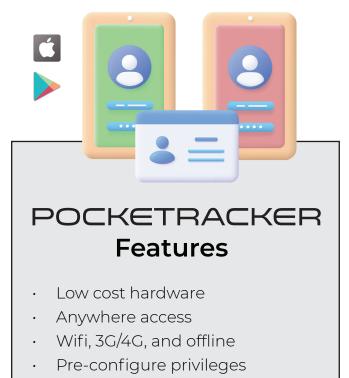

PockeTracker enables verification of privileges and access to events and facilities with your phone or tablet. Scan ID cards and quickly view a green or red screen to permit or deny entry.

POCKETRACKER
Features

- Low cost hardware
- Anywhere access
- Wifi, 3G/4G, and offline
- Pre-configure privileges
- Easily connect to multiple data sources
- Prevent fraudulent entry

Efficiency and Control

Permits or denies entry based on user-defined personal criteria. Results are displayed using a green background for "APPROVED" and red for "DENIED".

Increased Security

Scans any ID card and displays personal data and photo. Status fields are included in the results giving the operator actionable information.

Multiple Scanning Technologies

Supports and interfaces with many ID card technology options including mag stripe, barcode and contactless.

Keep Thorough Records

Record transactions by name, time and event. All logged transaction data is available for auditing.

High Security Events and More

PockeTracker has been used for verifying entry to famous high security red carpet events. It is also popular on construction sites, college campuses and more.
